To, National Stock Exchange of India Limited Exchange Plaza'. C-1, Block G, Bandra Kurla Complex, Bandra (E), Mumbai - 400 051. **NSE SYMBOL: AURIONPRO**	To, The BSE Limited, 25th Floor, P. J. Towers, Fort, Mumbai: 400 001. **SCRIP CODE: 532668**

Sub: Press Release

Dear Sir/Madam,

Please find attached a Press Release with titled **"Aurionpro's subsidiary AryaXAI Launches AryaXAI AI Alignment Labs in Paris and Mumbai to Drive Frontier Research on AI Interpretability and AI Alignment."**

Kindly take this on your record.

Thanking you,

Yours faithfully

For Aurionpro Solutions Limited

Ninad Kelkar
Company Secretary

Aurionpro's subsidiary AryaXAI Launches AryaXAI AI Alignment Labs in Paris and Mumbai to Drive Frontier Research on AI Interpretability and AI Alignment.

India/ Singapore, 24th April 2025: AryaXAI, the research and development group within Arya.ai—an Aurionpro Company—today announced the launch of '**The AryaXAI AI Alignment Lab**' in Paris and Mumbai to accelerate research in the verticals of AI Explain ability and Alignment. This initiative aims to bring together the finest global talent and research institutions to address key challenges in artificial intelligence.

As AI systems grow increasingly complex, the potential risks associated with model failures, misalignment, and lack of accountability simultaneously escalate. This increases the risks of using AI in mission-critical and highly regulated use cases, necessitating urgent solutions. AryaXAI is at the forefront of research in this space, and the launch of the AryaXAI AI Alignment Labs will help expedite these efforts by developing scalable frameworks for explainability, alignment, and risk management. This ensures AI models operate with precision, uphold transparency, and introduce ground breaking methodologies to train and align models, setting new benchmarks for responsible AI.

"AI Interpretability and Alignment are some of the most complex challenges in scaling AI for mission-critical use cases. Solving these means improved visibility inside the models and scalable model alignment techniques, be it for managing the risk, faster/better fine-tuning, model pruning, or new ways of combining model behaviors. We at AryaXAI have been working on these areas," says Vinay Kumar, CEO of Arya.ai.

"Following our launch in December 2024, we are now expediting this journey. Very few teams are working on this front, and we wanted to expand our focus through a centralized approach that engages with global talent and academia. Paris, with its thriving AI community and centrally located massive academic eco-system in the EU, was a natural choice. Our Mumbai lab will tap into top Indian researchers in AI and engage with universities on frontier problem statements," he adds.

AryaXAI previously released a new open-source explainability technique called 'DLBacktrace (DLB)' to explain and understand the insides of any deep learning model. The team has also released 'XAI_Evals' (https://github.com/AryaXAI/xai_evals), a new library for evaluating and benchmarking explainability techniques. With the launch of AryaXAI AI Alignment Lab, the team plans to expedite the development of multiple new techniques and release them as open source.

About AryaXAI

AryaXAI provides enterprise-grade AI inferencing platform focused on interpretability, observability, risk and alignment for mission-critical and highly regulated AI solutions. Our stack enables organizations to deploy AI systems responsibly by providing comprehensive

tools for understanding, monitoring, aligning and managing the risk to ensure the reliable behaviour of AI models at scale.

Started off as a small research team within Arya.ai, AryaXAI had been working on SOTA explainability and alignment techniques. AryaXAI is the creator of DL Backtrace, a new and highly accurate explainability technique for deep learning models.

About Aurionpro Solutions:

Aurionpro Solutions Ltd. (BSE: 532668) (NSE: AURIONPRO) is a global leader in providing advanced technology solutions. Focusing on sectors such as Banking, Mobility, Payments, Insurance, Transit, Data Center Services, and Government Sectors. Aurionpro leverages Enterprise AI to globally deliver comprehensive technology solutions to over 300 clients worldwide. With a team of 2,800 professionals, Aurionpro offers deep domain expertise and IP-led offerings. This combination of fintech and AI talent, coupled with a flexible, passionate, and collaborative approach, enables significant growth. Learn more at www.aurionpro.com.
