## **Aurionpro Solutions Secures Breakthrough European Deal; Partners with a Leading UK-Based Financial Institution to Deploy a Cutting-edge AI-Native Credit Assessment Platform**

*London, July 01, 2025* — Aurionpro Solutions Limited (BSE: 532668 | NSE: AURIONPRO), a global enterprise technology leader, has announced its European market expansion through a strategic win with a leading UK-based financial institution. The partnership signifies a key milestone in Aurionpro's global expansion strategy, introducing its cutting-edge AI-native solutions from Arya.ai, to transform lending operations across Europe's competitive financial landscape.

This marks the first in a series of strategic Enterprise AI-native implementations Aurionpro is bringing to market through its Integro Lending Suite and Arya.ai capabilities. Aurionpro will deploy Arya.ai's intelligent credit assessment capabilities, thus replacing the institution's traditional systems with an AI-native solution. This implementation aims to simplify underwriting processes, reduce operational risk, and enable the institution to scale efficiently.

The institution operates in a highly competitive market and sought to leverage technology to accelerate its speed to market. Aurionpro addresses this by automating statement analysis, offering AI-generated credit summaries, and integrating fraud detection and assisted AI capabilities. The platform flags potential tampering in financial documents, thus enabling accurate, real-time decision-making.

"This is a defining step in our global fintech journey," said **Deekshith Marla, Co-founder of Arya.ai - an Aurionpro Company**. "By combining our domain-rich lending expertise with Arya.ai's cutting-edge AI capabilities, we are helping financial institutions transition from traditional workflow-based processes to AI-native decisioning—increasing speed to market, reducing risk, and enabling scale. This first deployment in Europe underlines our commitment to reimagining credit ecosystems globally."

The platform is designed to be extensible across multiple use cases in financial services, including trade finance, cash management, and underwriting, making it a future-ready investment. This deployment is especially significant as European financial institutions face mounting pressure to adopt straight-through processing (STP) and gain competitive edge through intelligent automation.

### **About Aurionpro Solutions:**

Aurionpro Solutions Ltd. (BSE: 532668 | NSE: AURIONPRO) is a global enterprise technology leader pioneering intuitive-tech through deep-tech IPs and scalable products.
