Aurionpro Secures Landmark Urban Mobility Project for Mumbai Metro

Wins major contract to implement advanced Smart Transit solutions for two key metro lines

Mumbai/Singapore, August 13, 2025 — Aurionpro Solutions Ltd. (BSE: 532668 | NSE: AURIONPRO) has secured a landmark Urban Mobility project in India's financial capital, a significant achievement in its Smart Transit and Urban Mobility business. The Company has secured this order from the Mumbai Metropolitan Region Development Authority (MMRDA) to design, supply, implement, and maintain the Automatic Fare Collection (AFC) system for Mumbai Metro Lines 4 and 4A. Valued at nearly INR 250 crores, the multi-year project will cover the delivery and implementation of the complete solution, including the central clearing house software (CCHS) and all ticketing, and payment hardware, followed by five years of maintenance and support.

This milestone deal is among the largest signed by Aurionpro in the Urban Mobility space and adds significant momentum to the growing mobility portfolio in the Company's Tech Innovation Group (TIG). Following recent wins with Delhi Metro and Chennai Metro, Mumbai now becomes the third major metro city in India to entrust Aurionpro with the development of its AFC system.

The Mumbai Metro Rail Projects, developed under the aegis of MMRDA, form the longest and one of the most ambitious rapid transit systems in the country. Designed to serve Mumbai City and the wider Mumbai Metropolitan Region, the network aims to deliver a faster, more efficient, and sustainable mode of transportation, easing congestion and improving connectivity across the region.

Sanjay Bali, President & Global Head – Tech Innovation Group (TIG) at Aurionpro, said: *“This is a prestigious and special win for us, and we are thankful to MMRDA for placing its trust in Aurionpro. We are proud to be part of a project that can transform connectivity in the country's financial capital. Aurionpro will deliver full system implementation for the project, including the Central Clearing House Software (CCHS). As the only company offering complete, end-to-end solutions in this domain,*

Aurionpro brings indigenously developed capabilities, including NCMC-enabled card readers and automated gates made in India.

India is making major investments to improve urban connectivity, and the metro rail network is growing rapidly with more lines and growing ridership. With our recent wins, we are becoming the preferred partner for automated fare collection systems as we are committed to and focused on providing complete software solutions and manufacturing capabilities under one roof. This achievement further strengthens our global position as a leading end-to-end provider of cutting-edge Urban Mobility solutions, and we look forward to adding more such wins in the future.”

Aurionpro offers comprehensive Automatic Fare Collection (AFC) solutions, covering everything from ticketing and payment hardware to central back-office systems, mobility apps, reservation portals, and operational infrastructure such as Operation Control Centres (OCC). Its Smart Transit solutions are used globally. Its expertise spans account-based ticketing (SaaS-based Pay-As-You-Go), EMV open-loop ticketing, proprietary system upgrades, hybrid AFC for railway reservations, citizen-centric mobility applications, and hardware for metro, BRT, railway, buses, ferries, and last-mile transit.

About Aurionpro Solutions:

Aurionpro Solutions Ltd. (BSE: 532668 | NSE: AURIONPRO) is a global enterprise technology leader pioneering intuitive-tech through deep-tech IPs and scalable products. With a strong presence across Banking, Payments, Mobility, Insurance, Transit, Data Centers, and Government, Aurionpro is setting new benchmarks for AI innovation and impact.
